Around the Club House

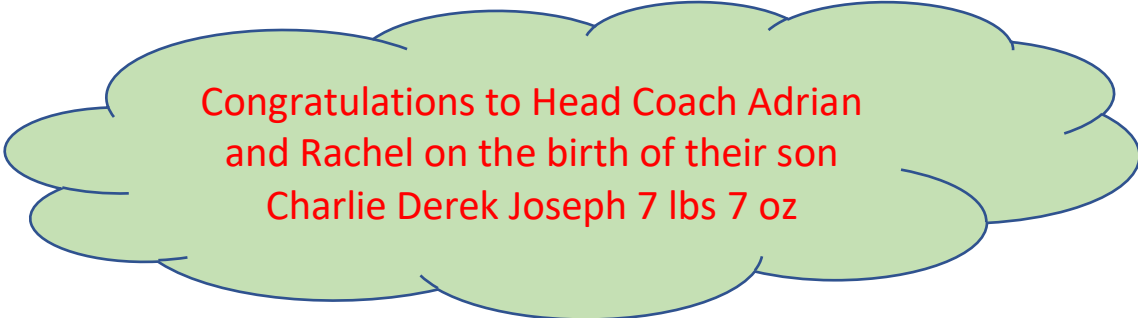

Garbage Update:

Halton Region and the City of Burlington will not pick-up our garbage or recyclables. After a lot of work, reviewing options, a private contractor has been hired to take away garbage. There are 4 large grey bins at the front of the gate. These will be emptied by the waste contractor. These bins are bunged as loose litter cannot be placed in them. Please do not place any garbage beside them. Because the club will be paying based on the amount of garbage, we are still asking members to take your own personal garbage home when you leave.

Practice Wall:

There is some scrap material between the practice wall and the main building. These items will be removed shortly. Until that time, please do not try and retrieve balls that are hit over the practice wall into this area.
